

## PRESS RELEASE PRAGUE 2019

The Cybersecurity Community Event in Prague, Czech Republic

**QuBit** is a **Cybersecurity Community Event** connecting the East and West and it is already the 6th year on the cybersecurity market in CEE region. QuBit **audience** presented more than 250+ cyber professionals from the various industries from the CEE region and other countries.

Sixth annual cyber community conference offers its delegates as usual **excellent speakers** representing organizations such as LIFARS, FBI, Tatrabanka, CISCO, IBM and many more, **leading edge topics** such as SCADA, APT10, Artificial Intelligence, Cryptomining & Cryptojacking and even more, **keynotes, case studies, panel discussions** and popular **networking events**.

First day, **April 9**, is dedicated to [full day hands-on trainings](#) focused on *Android Reverse Engineering, Information security risk management* and *Security Information & Event Management (SIEM)*.

**April 10-11** are two full days, where conference is running in **two parallel tracks** (cyber and management). QuBit sessions are strictly educational, with no marketing presentation as QuBit listens to its audience and offer only quality and valuable presentations and partners who are helping to improve current state of environment.

Cybersecurity space is constantly changing, but one thing remaining constant – the threat of cyberattacks. The only way to defend against the threats we are facing is to **share knowledge and to spread information**. And that is what QuBit conference is all about. It is event gathering some of the brightest mind in the field, who are sharing their expertise, experience and knowledge.

Invest in yourself and [register now](#).
